LeetCode

Technical Skills

Languages & Frameworks: Python (2+ yrs), Java, JavaScript, TypeScript, React, Node.js, Express.js, HTML5, CSS3, Dart, Flutter, Next.js, Flask, Tailwind CSS

Database & Tools: MySQL, HQL (Hive Query Language), HBase, SQLAlchemy, SQLite

Expertise: Data Structures & Algorithms, Full Stack App Development, API Design, Machine Learning, Big Data Analytics, Data Analysis, Object-oriented programming, Debugging / Testing, Code reviews, Problem Solving, Critical Thinking, Time Management, Team Collaboration, Communication Skills, Public Speaking

Education

Gokaraju Rangaraju Institute Of Engineering and Technology

Sep 2023 – July 2027

Bachelor of Technology in Computer Science — Artificial Intelligence and Machine Learning

Hyderabad, Telangana

Professional Experience And Projects

Viswam AI — Meta | May 2025 - June 2025 | Certificate Link

AI-Intern | Python, GitLab, Streamlit, RAG

Hyderabad, Telangana

- Built a data collection and storage application using **Python** and **Flask**, structuring domain-specific data to contribute to **ML model training** pipelines.
- Designed and deployed **Streamlit** applications integrating the **Hugging Face API** for dynamic **AI inference** and experimentation.
- Applied **prompt engineering** techniques to refine **Hugging Face** model inference, improving response accuracy and usability across application scenarios.
- Built **automated data pipelines** to structure and send datasets for **ML model training**, accelerating data collection and improving dataset reliability.

Autograde | Flask, Python, SQLAlchemy, TensorFlow Hub, NLP, JavaScript, HTML/CSS | Deployment Link

- Built an **AI-powered answer evaluation system** using **semantic similarity**, **NLP**, and **Natural Language Inference** to automatically grade descriptive answers with high contextual accuracy.
- Developed a scalable **role-based academic platform** with **teacher/student portals**, classroom management, automated submissions, and intelligent grading workflows using **Flask** and **SQLAlchemy**.
- Implemented **Universal Sentence Encoder**, **TF-IDF similarity**, contradiction detection, and automated **PDF extraction** pipelines to streamline bulk evaluation and reduce manual grading effort.

SnapShots | Next.js, TypeScript, Tailwind CSS, Canvas API | Deployment Link

- Built a **full-stack mockup generation tool** using **Next.js** and **TypeScript** that automates App Store and Product Hunt asset creation, used by **200+ product creators**.
- Engineered a **zero-latency client-side rendering pipeline** via the **Canvas API**, enabling real-time image transformations locally — eliminating server overhead and keeping all user assets in-browser.
- Built a **multi-platform export engine** that auto-scales assets to App Store and Product Hunt specs, eliminating manual resizing across multiple format variants per export.

TextBehindVideo | Next.js, Cloudinary AI, Framer Motion, Tailwind CSS | Deployment Link

- Built a **cloud-integrated video processing platform** in **Next.js** that automates rotoscoping — users layer animated text behind subjects without manual masking, powered by **Cloudinary AI** background removal.
- Designed a **synchronized multi-layer compositing system** that isolates foreground subjects in real-time and renders **dynamic text layers** behind them with frame-accurate positioning.
- Built a high-fidelity **preview interface** with **Framer Motion**, maintaining smooth **60fps playback** during live text animation editing over heavy video assets.

Achievements

- Solved **1000+ DSA questions** across major coding platforms, demonstrating strong problem-solving abilities and mastery of algorithms.
- Actively participated in technical workshops, Hackathons, managing key organizational tasks, overseeing arrangements, and ensuring the smooth and efficient conduction of events.
